ABOUT ME

When I set my mind to something I work very hard to achieve it. Whether it be building a career as a physiotherapist in Brazil, coming to Sydney to learn English or my current focus of reskilling as a Software Developer.

I have embedded myself in the Sydney tech industry by attending meetups, enrolling in the LevelUp program at ThoughtWorks and studying the Software Engineering Immersive course at General Assembly.

I love the ever-changing nature of this industry and that I have chosen a career path where I will always be learning. I also love the diversity of the tech community - I feel like I have found my people!

RELEVANT PROJECTS

My News

🔗 <https://github.commonicamendesmontanha/my-news>

React, Node.js, Express, SASS

My News App was built to be accessible to everyone and aggregate internet content into one convenient place, making it possible for you to quickly scan headlines and full stories at a glance from a variety of different providers.

Trip Wallet

🔗 https://github.commonicamendesmontanha/trip_wallet

Ruby on Rails, Postgres

Trip Wallet was built for users that need to track expenses during travels.

Tic Tac Toe

🔗 <https://github.commonicamendesmontanha/tic-tac-toe>

Javascript, HTML, CSS and JQuery

Inspired on Super Nintendo Classic I have built a game using the NES.css Framework, which gives us a nostalgia.

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEERING IMMERSIVE STUDENT

General Assembly (Mar 2019 - Jun 2019 • 4 mos)

- Building web applications with Node.js and Ruby on Rails.
- In-depth front-end development with JS, React.js and Vue.js.
- Integration with third-party Restful APIs.
- Deploying code to cloud providers such as Heroku.
- Team collaboration with Agile workflow and Git.

TRAINEE SOFTWARE DEVELOPER

ThoughtWorks - LevelUp (Aug 2018 - Oct 2018 • 3 mos)

Throughout the training I learned about Agile practices (inceptions, stand-ups, story writing, agile, sprints, continuous delivery, test-driven development, retrospectives) and how to work as an efficient, fully functioning and communicative team.

STUDENT LEADER

Sydney College of English - SCE (Feb 2017 - Sep 2017 • 8 mos)

My role as a Student Leader was a bridge between the college staff and the student body. I served to distribute information to the other students, gather ideas and suggestions from students as well as sharing my own, and also lead after-school activities.

I had great success in conducting activities as I came up with new ideas and saw them through to fruition. My events garnered amazing participation as I would often be leading a group of 50 or more students. I am a hard worker and I really enjoyed donating my time and my skills to organize events for students.

SKILLS

Javascript React Ruby Ruby on Rails Express

Node.js JQuery Graphql HTML 5 CSS 3 SASS
